2. Signing Up (registration) Functionality .....4

3. Signing In (login) Functionality.....6

## 1. Introduction

The purpose of this documentation is to explain the contents of the 2nd milestone of “Living History” project.

2nd milestone is focused on "Signing-up (Register) and Signing-in (Login) on Client"

- ✓ Signup forms have been created on the client demo.
- ✓ Signin forms have been created on the client demo.

Additionally, there have been some developments on the Android and backend sides of the application.

- ✓ The Android version of the client (currently available only on emulator) has been developed.
- ✓ Resolution problems on the Android client have been resolved.
- ✓ Code has been developed for responding to Json requests.

## 2. Signing Up (registration) Functionality

When the user clicks Login button, the following form comes up.

The image shows a web application interface for "Living History". At the top, there is a dark header bar with "Living History" on the left and "Login" on the right. The main content area has a light gray background. In the center, there is a white rectangular box containing the "Sign In" form. The form has the title "Sign In" at the top. Below the title are two input fields: the first has an email icon and the second has a lock icon. Below these fields is a red "Submit" button. At the bottom of the form, there are two links: "Forgot Password?" and "Don't have an account with us? Register now!".

**Figure 1: The Sign In (Login) Form**

If the user does not have an account on the system, he/she has to click “Register now”. Afterwards, the registration form shown below comes up.

Sign In (Login) form

Currently, the Sign In function is not operational.  
This document will be updated with a new version when the Login functionality starts to operate.
